# InSinkErator Water Taps - Making life easier with intelligent design.

By incorporating an InSinkErator water tap into your kitchen, you can enhance your efficiency and productivity instantly.

With a range of models available, from multi-functional mixer taps to side taps, InSinkErator has options that cater to your needs.

## Benefits of installing an InSinkErator Water Tap

**Convenience:** Instantly access near-boiling water, which is useful for various tasks such as making hot beverages, cooking, and cleaning.

**Time-saving:** Since the hot water is readily available, you no longer need to wait for the water to boil in a kettle or on the stove.

**Energy efficiency:** Hot water dispensers typically use less energy than boiling water in a kettle, as they only heat the water you need.

**Space-saving:** InSinkErator water taps are compact and can be mounted under the sink, freeing up valuable counter space in your kitchen.

**Improved taste:** All water taps use a 5-micron filter that remove impurities from the water, enhancing the taste of your beverages and food.

**Stylish design:** Coming in various designs and finishes, making it easy to find one that complements your kitchen's aesthetic.

**Easy installation:** Installing is relatively straightforward and can be done by a plumber or someone with basic plumbing skills.

**Low maintenance:** Designed for low maintenance, featuring durable parts and simple filter replacements, for a stress-free user experience.

## Side Tap System

The DualTap is the ultimate kitchen side tap, delivering both filtered near-boiling and filtered chilled drinking water, it's perfect for entertaining or just grabbing a quick cuppa or a refreshing glass of chilled water.

The near boiling filtered hot water comes from the NeoTank®, an easily installed under sink hot water tank, which plugs straight into a normal wall socket. The chilled filtered water comes from the NeoChiller®, a chiller unit that fits neatly beneath your bench.

## DualTap Specifications

- Instant filtered near boiling and filtered chilled water.
- Gentle touch, two lever dispenser
- Spring loaded return safety mechanism
- Elegant swiveling spout. Tap insulated from heat
- Tap mounted on either the kitchen work surface or sink (35mm-38mm hole required in bench)
- Reduce chlorine, lead, and other unpleasant tastes, chemicals and odours from the water
- Easy to install 2.5 litre stainless steel NeoTank.
- Easy to install 5 litre NeoChiller
- Both tanks plug directly into electrical sockets close to appliance
- 3-year in-home warranty - Residential only

**WARNING:**  
While the DualTap has a safety lever, please be careful when dispensing near boiling water and children should be kept away.

## Side Tap Systems

InSinkErator's HotTap Systems dispense near-boiling filtered hot water from an easily installed under-sink hot water tank, which plugs straight into a normal wall socket.

The HotTap produces near-boiling water perfect for making hot drinks, speeding up the cooking of pasta or vegetables, cleaning dishes and a host of other kitchen tasks.

There are also models with the added bonus of delivering filtered cold water from the same tap.

## HotTap Specifications

- Near boiling filtered hot water + ambient cold drinking water
- Elegant swiveling spout. Tap insulated from heat
- Gentle touch, two lever dispenser, with safety mechanism
- Tap mounted on either the kitchen work surface or sink
- (35mm-38mm hole required in bench)
- Easy to install 2.5 litre stainless steel tank fitted under sink
- Plugs directly into electrical socket close to appliance
- Touch-panel display for precise temperature adjustment
- Shut-off valve in filter head automatically stops water flow
- Easy to replace filter
- 2-year in-home warranty - Residential only

WARNING:

# Plug-In Convenience for Instant Near-Boiling Water

The compact and innovative NeoTank delivers near-boiling water for hot drinks and slashes your cooking times with steaming hot water for vegetable and pasta preparation. This ingenious unit also comes with an optional connector that allows you to filter your cold water as well, giving you great tasting filtered water.

- NeoTank is only about the size of a toaster, making it easy to hang on the back wall under your kitchen bench with minimum fuss
- The 2.5 litre capacity is easily sufficient for most kitchen tasks while reducing the heating requirements and saving energy costs
- Finger-tip control with a touch-panel display for precise temperature adjustment.
- Able to run on a standard electrical circuit drawing 5.6AMPs with an element size of 1.3KW
- Quiet, energy-efficient operation
- Easy installation with tool-free connections and dry-start protection.
- Standard 3-pin plug that plugs straight into a wall socket

in sink erator

# Compact Under-Bench Chiller for Cold Filtered Drinking Water

NeoChiller is a compact chiller unit that fits neatly beneath your benchtop and connects to the tap. It filters water from the mains supply through the InSinkErator easy-change water filter, removing impurities to ensure a fresh, pure taste. The chiller unit then cools the water to the perfect drinking temperature, straight from the tap.

With NeoChiller there's no messing around with filter jugs, no lugging bottles of water home from the shops and no plastic waste. It's better for you, and better for the environment.

- Small, compact domestic chiller unit
- Designed for easy installation under the kitchen sink
- Dispenses up to 7 litres per hour of cold, still water between 3°C and 10°C
- Filtered to remove impurities and odours, without affecting the water's natural mineral content
- Ice-bank cooling technology for optimum performance
- Standard 3-pin plug that plugs straight into a wall socket
- CE approved

## Filtered water... just tastes better!

All InSinkErator instant hot water taps come with an in-line filtration system using replaceable cartridges. The super fine 5-micron filters reduce impurities and odours, giving you better tasting water for your water bottle, coffee or tea.

The twist-off/twist-on filter is easy to install and designed so the water automatically shuts off when the filter is removed, eliminating the need for a separate shut-off valve. Depending on local water quality and usage volumes, filter replacement is recommended every 6-12 months.

- Super fine 5 micron filter for even cleaner water
- Quick-Connect Push-In Fittings guarantees a quick, easy installation
- Valve-in-Head Design automatically shuts off water flow when filter cartridge is removed, eliminating need for separate shut-off valve
- Low Pressure Drop Filter design assures consistently flawless performance
- Reduces chlorine, lead, turbidity, particulates & other unpleasant tastes and odours
- NSF Standard 42
- 6-12 month expected filter life, depending on water quality and use
- Two filter cartridges per pack
