Food Waste Disposers

InSinkErator®
In New Zealand, over 700,000 tonnes of food waste goes to landfills. InSinkErator food waste disposers divert food waste from landfills, where it produces methane, a harmful greenhouse gas. Instead the food waste, which is typically 70-80% water, travels to the wastewater treatment plant where it can be converted to electricity.

Benefits of using one

- Convenient
- Hygienic
- Heavy duty induction motors
- Quietest on the market
- Reduces odours in your kitchen
- Reduces waste going into the bin
- Reduced food going to landfills
- Safe on septic tanks
- Easy to install (plumber recommended)
- Uses only $2 of power annually
- Made in the USA
- Up to 10-year warranty
Advanced Technology

Engineered to handle even the toughest food waste, with the least noise of any disposer, the Evolution Series is the most advanced line of food waste disposers available anywhere.

QuickLock™ Sink Mount
“twist-on, twist-off” sink mount makes installation fast and easy.

SoundSeal™ Technology
Anti-Vibration Mount™ Quiet Collar™ & Sound Limiter™ technology.

MultiGrind™ Technology
3-stage design makes quick work of both hard and fibrous foods.

DuraDrive™ Induction Motor
Powerful, heavy-duty motors ensure high performance and long life.

PowerBoost™ Micro Processor
Delivers more power to boost the grinding capability.

WaterMark Certified & Authorised
All our Food Waste Disposers pass the WaterMark test!
MODEL 46
Food Waste Disposer
The entry level InSinkErator Food Waste Disposer, suitable for lighter use in smaller households.

- Basic Sound Reduction Technology
- 1 Stage Grinding System
- Grind Chamber 980mL Capacity
- Quicklock™ Sink Mount for Easy Installation
- Air Switch Kit Available (33mm Hole For Button)
- 0.55Hp Dura-Drive™ Heavy Duty Induction Motor
- 2-Year In-Home Warranty
- Made in the USA

- SoundSeal Plus™ Evolution Quieter Technology
- MultiGrind Plus™ 3 Stage Stainless Grinding System with Auto Reverse Action
- 1180 ml Stainless Steel Grind Chamber 180ml Large Capacity
- Quicklock™ Sink Mount For Easy Installation
- Micro Processor for power to boost grinding capability
- Built-in Air Switch (33mm hole for button)
- 0.75Hp Dura-Drive™ Heavy Duty Induction Motor
- 10-Year In-Home Warranty
- Made in the USA

Evolution 200 dimensions in millimeters
Over 6,000,000 homeowners can’t be wrong!

In the United States, there’s an InSinkErator food waste disposer in over 6,000,000 homes with a septic tank system.

InSinkErator food waste disposers have always been safe for properly sized septic systems. For example, if your system is sized for a dishwasher or washing machine, it can handle a disposer. After all, our disposers use about as much water per day as one flush of a toilet.

No fuss, no mess, no problem...and no reason to deny yourself the convenience and hygiene of an InSinkErator food waste disposer.

Dispelling the myths

Does a disposer have blades?
No, food waste disposers do not have blades. They quickly and quietly grind food waste using swivel lugs and MultiGrind Technology™.

Does a disposer clog drains?
Modern disposers grind food waste into very fine particles. Also, food waste is 70-80% water, so easily travels through drains.

Does a disposer use a lot of water & power?
Although operating a food waste disposer does involve running water and using electricity, the environmental impact is minimal. Disposers use only about 1% of a household’s total water consumption (about one flush of the toilet per day) and cost approximately $2 per year in electricity to operate.

Are disposers noisy?
InSinkErator Sound Limiter insulation and Anti-Vibration Mount Technology mean the Evolution™ models can operate with minimal noise versus standard disposers. We also recommend installing a quality sink, which can eliminate vibration and noise.

Do you need a double sink?
A food waste disposer can be installed with both a single or double bowl sink. Check sink and food waste disposer dimensions for details.

You can’t put that down a disposer?
A food waste disposer can handle a wide range of food waste including, fruits, veggies, chicken bones, fish bones. Tea bags, egg shells, avocado skins/ stones and celery.
InSinkErator have a range of accessories for the Food Waste Disposers to customise the sink and colour match bench-tops.

**Air Switch Covers**
- White Finish
  - Product Code: IP73274J
- Matte Black Finish
  - Product Code: IP73274C
- French Gold Finish
  - Product Code: IP73274G
- Mocha Bronze Finish
  - Product Code: IP73274D

**Stoppers**
- White Finish
  - Product Code: IP70117D
- Matte Black Finish
  - Product Code: IP75090D
- French Gold Finish
  - Product Code: IP75083D
- Mocha Bronze Finish
  - Product Code: IP75073D

**Sink Flanges**
- Square Waste Sink Adapter
  - Product Code: IP6000D

**Strainers**
- Silver Saver Strainer
  - A strainer that stops cutlery going down the drain. Designed to suit the following disposers: EVO200, EVO100, 66, 56, 46
  - Product Code: IP72375D

A little history

1927
Tinkering with an idea and some sheet metal, Racine architect John W. Hammes invents the first food waste disposer.

The 1940s
Bob Cox, vice president of sales sold disposers to plumbers instead of appliance dealers and by 1952 he pitched the product out of pink Pontiac.

The 1950s
As television came of age, so did television advertising, using the power of celebrity endorsements of George Burns, Barbara Walters, and later Phyllis Diller.

The 1960s
Emerson Electric Co. purchases InSinkErator.

The 1970s
InSinkErator started producing Trash Compactor and Hot Water Dispensers.

The 1990s
New York City Department of Environmental Study concluded a two-year analysis, and approved the use of food waste disposers.

2000 and beyond
The Evolution Series® was launched coming with advanced sound, grind, anti-jam and antivibration technologies. The MultiTap was launched in the UK in 2016, providing near-boiling water, with standard hot and filtered cold water, all from one tap.
