WHAT YOU SHOULD KNOW BEFORE YOU BEGIN

- Please refer to the installation, Care & Use manual packaged with your hot water tank and filtration system for additional Important Safety Information and installation instructions.
- For your satisfaction and safety, read all instructions, cautions and warnings before installing or using this tap.
- This particular unit is not for commercial/industrial use.

SYSTEM REQUIREMENTS (HOT WATER TANK, FILTRATION SYSTEM AND TAP):

- Make sure that all electrical, plumbing and connections conform to local codes.
- A standard, earthed (grounded) electrical outlet, with continuous supplied power, is required under the sink for the tank.
- In Australia and New Zealand, all plumbing and electrical work must be completed by a qualified tradesperson. The installation must conform to AS/NZS3500.4 and AS/NZS3000.

- Do not install the filter on hot water supply lines. The maximum operating water temperature of this system is 38ºC (100ºF).
- Attach the filter to the cold water supply only.
- The hot water supply should not exceed 65ºC (149ºF).
- It is recommended that a dedicated control valve be installed on the cold water line supplying water to the filter system.
- Do not install if water pressure exceeds 860 kPa (125 psi). If your water pressure exceeds 550 kPa (80 psi), you must install a pressure limiting valve. In Australia and New Zealand, a watermark certified AS/NZS2845.1 350 kPa (50 psi) set pressure limiting valve and dual check valve must be used.
- Do not install where water hammer conditions occur. If water hammer conditions exist you must install a water hammer arrester.
- The flexible vent and outlet tubes must be correctly connected to the tap supplied by the manufacturer. They must not be obstructed or connected to a normal tap or any other type.
- Protect from freezing, shut off water supply, remove filter cartridge, drain hot water tank and tubing when temperatures are expected to drop below 4ºC (40ºF); see Seasonal Storage/Drainage section.
- Do not use a torch or other high temperature sources near system, cartridges, plastic fittings or plastic plumbing.
- Do not install near water pipes which will be in path of a drilling tool when selecting the position to mount the bracket.
- Mount system in such a position as to prevent it from being struck by other items used in the area of installation.
- Ensure that the location and fixtures will support the weight of the system when installed and full of water.
- When mounting tank and filter, screws provided are for use in wood studs or cabinets only. Use wall anchors (not supplied) for installation into plasterboard.
- Ensure all tubing and fittings are secure and free of leaks.
- Do not install using rigid piping. System intended for use with plastic water lines (such as PEX tubing, PE tubing, PP tubing).
- Do not install this system if any of the quick connect collets are missing from the filter head or Y-Quick Connector. Contact an authorised InSinkErator Service agent if collets are missing from any fittings.
- Important: Do not allow the unit to continuously boil.
- Regularly inspect the system. If there are signs of water leakage, turn off the water supply and contact an authorised InSinkErator Service agent.

ADDITIONAL CONSIDERATION WHEN UTILISING FILTRATION SYSTEM:

- Do not operate this product if it has been or appears to be damaged in any manner or after the product malfunctions, or is dropped. Return the complete product immediately to your retail dealer for inspection, and if necessary, adjustment or repair.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Use this water heater only for its intended use as described in this manual.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

SAVE THESE INSTRUCTIONS.

WARNING: A potentially hazardous situation, which, if not avoided, could result in death or serious injury.

CAUTION: A potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.

NOTICE: Notice is used to address practices not related to personal injury.

- Use this water heater only for its intended use as described in this manual.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Do not operate this product if it has been or appears to be damaged in any manner or after the product malfunctions, or is dropped. Return the complete product immediately to your retail dealer for inspection, and if necessary, adjustment or repair.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

WARNING: To reduce the risk associated with choking: Do not allow children under 3 years of age to have access to small parts during the installation of this product.

WARNING: Electric Shock Hazard. To reduce the risk of electric shock, do not immerse or expose the product, flexible cord or plug to rain, moisture or any liquid or when standing in or on damp or wet surfaces. If any electrical product falls into water, UNPLUG it immediately. DO NOT REACH INTO THE WATER. Important: Prior to reconnecting to the power supply, the product should be inspected by a qualified technician.
WHAT YOU SHOULD KNOW BEFORE YOU BEGIN

• This particular unit is not for commercial/industrial use.
• This outlet must be fused and should not be controlled by the same wall switch that operates the disposer, unless you have a
• This product contains stainless steel. The manufacturer cannot guarantee against rusty water because of the number of factors
• Do not install using rigid piping. System intended for use with plastic water lines (such as PEX tubing, PE tubing, PP tubing).
• Ensure all tubing and fittings are secure and free of leaks.
• Mount system in such a position as to prevent it from being struck by other items used in the area of installation.
• Do not install near water pipes which will be in path of a drilling tool when selecting the position to mount the system bracket.

WHAT YOU NEED TO GET STARTED

• Drill, T-fitting, Dedicated control valve, Adjustable spanner,
• Anchors for plasterboard, Basin wrench,
• Phillips screwdriver, Pencil, Tape measure, Level

Equipment You May Need:

• Tubing cutter, Hole Saw, Hole Punch

WARNING: Personal Injury/Property Damage. To reduce the risk associated with hazardous voltage due to an installer drilling through existing electric wiring in the area of installation: Do not install near electric wiring or water pipes which may be in path of a drilling tool when selecting the position to mount the system bracket.

Important: Always arrange the power cord so that it cannot come in contact with hot surfaces.
• Do not disconnect the product from the power supply by pulling on the cord.
• The use of accessory attachments other than those recommended by the manufacturer may cause safety hazards.
• The recommended connection may be made to an existing cold water line with a branch terminating with a shutoff valve, a pressure relief and dual check non-return valve sited adjacent to the product.

WARNING: Electric Shock Hazard Using an ungrounded (no earth ground) or improperly connected appliance can result in serious injury or death from electrical shock.

This appliance must be earthed (grounded). This steaming hot water tank is equipped with a cord that has a grounding conductor and earth ground pin. The plug must be connected to an appropriate outlet that is properly installed and earthed (grounded) in accordance with all local codes and ordinances. Do not modify the plug provided with the appliance – if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Check with a qualified electrician or tradesman if you are in doubt as to whether the steaming hot water tank is properly earthed (grounded).

CAUTION: Personal Injury/Property Damage. This tank is a non-pressurised tank. DO NOT modify this system. DO NOT close vent tube or connect other types of taps or valves to the tank. Use only the InSinkErator tap supplied. Use only parts provided. Contact an authorised InSinkErator Service agent for repairs or replacement components.

WARNING: To reduce the risk associated with the ingestion of contaminants: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

A steaming hot water tank, like any water heater, has a limited life and will eventually fail. To avoid possible property damage and personal injury, this steaming hot water tank should be regularly examined for leakage and/or corrosion and replaced when necessary. A drain pan, plumbed to an appropriate drain or outfitted with a leak detector, should be used in those applications where any leakage could cause property damage.

WARNING: Fire Hazard. To minimise possibility of fire, DO NOT store flammable items such as rags, paper or aerosol cans near the tank. DO NOT store or use petrol or other flammable vapours and liquids in the vicinity of this or any other appliance.

WARNING: Leak Hazard. Regularly inspect tap and plumbing fittings for leaks, which can cause property damage and could result in personal injury.

NOTICE: Property Damage. To reduce the risk associated with property damage due to water leakage or flooding, and to ensure optimal performance:
• Read and follow all instructions before installation and use of this system.
• Installation and use MUST comply with all state and local plumbing codes.

**NOTICE: Property Damage.** Do not pinch or break copper tubing. Do not distort the last 25 mm (1") of tubing.

**Note:** Required 33.5 mm (1.3") hole size. For ease of installation put the braided hoses through first.

**NOTICE: Property Damage.** Do not plug in hot water tank. Tank must be located within 600 mm (23.5") of tap and within 760 mm (30") or less of a standard earth (grounded) outlet. DO NOT extend plumbing or electrical lines.

**WARNING.** (Personal Injury) Do not locate filter above an outlet or other electrical device. Install head and bracket so that connections require no stretching, kinking or pinching of tubing.
NOTICE: Property Damage. Do not plug in hot water tank. Tank must be located within 600 mm (23.5") of tap and within 760 mm (30") or less of a standard earth (grounded) outlet. DO NOT extend plumbing or electrical lines.

* NOTICE: Property Damage. Pinched or broken copper tubing may cause damage to the water tank. Check to make sure tubes are connected correctly and are pushed down as far as possible.

WARNING. (Personal Injury) Do not locate filter above an outlet or other electrical device. Install head and bracket so that connections require no stretching, kinking or pinching of tubing.
**NOTICE: Property Damage.** Top surface of cartridge will be flush with bottom of filter head when fully engaged.

**NOTICE: Property Damage.** Do not extend the lines farther than the 400 mm (16") provided. Ensure tube(s) and “Y” connector fit securely.

**NOTICE: Property Damage.** Tube runs need to form to the cabinet’s contours to allow storage space with no sharp bends. Tubes need clean, perpendicular, burr-free cuts to ensure a true fit. Join remaining tube to cold water supply only.

**NOTICE: Property Damage.** Do not use an extension lead with the tap. (A standard earthed outlet within 760 mm (30") of the tap is required under the sink.)

*Note:* Check all connections to ensure they are tight and that there are no leaks.
 Tube runs need to form to the cabinet's contours to allow storage space with no sharp bends. Tubes need clean, perpendicular, burr-free cuts to ensure a true fit. Join remaining tube to cold water supply only.

Note: Check all connections to ensure they are tight and that there are no leaks.

NOTICE: Property Damage. Do not extend the lines farther than the 400 mm (16") provided. Ensure tube(s) and "Y" connector fit securely.

Note: Water will be cold at first. Allow 12-15 minutes for water to reach target temperature. Gurgling or hissing is normal during the initial heating cycle.

Note: Water will be cold at first. Allow 12-15 minutes for water to reach target temperature. Gurgling or hissing is normal during the initial heating cycle.

WARNING: Scalding Hazard. The tap dispenses near-boiling water which can instantly cause scalds or burns. Use care when operating this appliance.

NOTICE: Property Damage. Do not use an extension lead with the tap. (A standard earthed outlet within 760 mm (30") of the tap is required under the sink.)
5-YEAR IN-HOME FULL SERVICE LIMITED WARRANTY

This limited warranty is provided by InSinkErator, a business unit of Emerson Electric Co. ("InSinkErator" or "Manufacturer" or "we" or "our" or "us") to the original consumer owner of the InSinkErator Product with which this limited warranty is provided (the "InSinkErator Product") at the residence in which the InSinkErator Product was originally installed ("Customer" or "you" or "your").

InSinkErator warrants to Customer that your InSinkErator Product will be free from defects in materials and workmanship, subject to the exclusions and limitations set forth below (the "Warranty Period"), for the next "5-Year Warranty Period", the full 5-Year period (whether measured from the date of installation or the date of purchase or the date of manufacture as identified by your InSinkErator Product serial number). You must keep your documentation supporting either (a) or (b) below. If you are unable to provide documentation supporting either (a) or (b), the Warranty Period commencement date will be determined by Manufacturer, in its sole and absolute discretion, based upon your InSinkErator Product serial number.

Permitted Uses

You may use your InSinkErator Product hot/cold water tank and filter system in combination with any genuine InSinkErator Product tank and component parts and/or Authorized OEM Products. "Authorized OEM Products" mean those hot or hot/cold water taps and component parts that have been manufactured by an authorized InSinkErator original equipment manufacturer ("Authorized OEM") and which have documentation expressly stating that such Authorized OEM Products are compatible with the InSinkErator Product(s). Authorized OEMs may change from time to time. A list of Authorized OEMs is available to you upon request at: InSinkErator.com. Use of your InSinkErator Product in combination with any products other than Authorized OEM Products will void this warranty.

What is Covered

This limited warranty covers defects in materials and workmanship, subject to the exclusions below, in InSinkErator Products used by a consumer Customer for residential use only, and includes all replacement parts and labor costs. "YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS WARRANTY WILL BE TO REPAIR OR REPLACE THE INSIONKERATOR PRODUCT, PROVIDED THAT IF WE DETERMINE IN OUR SOLE DISCRETION THAT NEITHER REMEDY IS PRACTICABLE, WE WILL PROVIDE YOU A REFUND OF YOUR PURCHASE PRICE OR A CREDIT TOWARDS ANOTHER INSINKERATOR PRODUCT.

What is Not Covered

This limited warranty does not extend to and expressly excludes:

• Losses or damages that are the result of the InSinkErator Product, use, misuse, alteration, misuse, abuse, neglect, negligence (other than Manufacturer’s), failure to install, maintain, assemble, or mount the InSinkErator Product in accordance with Manufacturer’s instructions or local electrical and plumbing codes.

• Wear and tear expected to occur during the normal course of use, including without limitation, cosmetic rust, scratches, dents, or comparable or reasonably expected losses or damages.

• Losses or damages caused by any product or component part used with the InSinkErator Products, including both Authorized OEM and products and components.

In addition to the above exclusions, this warranty does not apply to InSinkErator Products installed in a commercial or industrial application.

No Other Warranty Applies

This limited warranty is the sole and exclusive warranty provided to the Customer identified above. No other express warranty, written or verbal, is extended by Manufacturer to any other person or entity or by any person or entity on behalf of Manufacturer. The terms of this limited warranty shall not be modified by the Manufacturer, the original owner, or their respective successors or assigns.

What we will do to Correct Problems

If your InSinkErator Product does not operate in accordance with the documentation provided to you, or you have questions concerning your InSinkErator Product or how to determine when service is needed, please call the toll free InSinkErator Customer Service (New Zealand: 0800 200 510) or (Australia):1300 136 205 or visit our website (New Zealand: www.insinkerator.co.nz) or (Australia): www.insinkerator.com.au. You may also notify us at: Pares Industries Ltd, 5 Tolich Place, Henderson, Auckland, New Zealand 0610 or InSinkErator, 471 Mountain Highway, Bayswater Vic 3153, Australia.

The following information must be provided as part of your warranty claim: your name, address, phone number, your InSinkErator Product make and model, purchase date or serial number, action or part required, the date of purchase, or the date of manufacture as identified by your InSinkErator Product serial number, and a description of the problem with your InSinkErator Product. Manufacturer may require that you establish proof of purchase and/or serial number.

InSinkErator Product is covered under this warranty. You will be given the contact information for your closest authorized InSinkErator Service Center. Please contact your InSinkErator Service Center directly to receive in home warranty repair or replacement service. Only a limited warranty service representative may provide warranty service. InSinkErator is not responsible for warranty claims arising from work performed on your InSinkErator Product by any other person or an authorized InSinkErator service representative.

Care and Use

CAUTION: Electric Shock Hazard. To prevent electrical shock, disconnect power before servicing unit. Use only a properly earthed and polarised electric outlet.

Notice

Regularly inspect the unit for any signs of leakage. If there are signs of water damage, immediately remove the unit from service.

• A drainage pan, plumbed to an appropriate drain or fitted with a leak detector, should be used in those applications where any leakage could cause property damage.

Cleaning the Tap

• Use only mild cleaners to clean the tap and plastic components.

• Cleaners with acids, abrasives, alkaline or organic solvents will result in deterioration of the plastic components and void the warranty.

Personal Injury

• Regularly check for signs of corrosion by examining the appearance of the dispensed water.

• If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorized InSinkErator service agent.

Steamers Hot Tap Troubleshooting

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>POSSIBLE CAUSE</th>
<th>WHAT TO DO</th>
</tr>
</thead>
<tbody>
<tr>
<td>Water and steam spills forcefully from spout without turning on the tap.</td>
<td>• Unit is boiling. May be normal during initial set-up.</td>
<td>• Firmly grasp and twist hot water tap handle while pressing down activator button to release some water from the tank.</td>
</tr>
<tr>
<td>Water is not hot.</td>
<td>• The unit is unplugged.</td>
<td>• Make sure the unit is connected to a correctly earthed electric outlet.</td>
</tr>
<tr>
<td>Water is too hot or not hot enough.</td>
<td>• Thermostat is not adjusted to your needs.</td>
<td>• Adjust the thermostat slowly, then firmly grasp and twist hot water tap handle while pressing down activator button for 20 seconds to bring in fresh water to be heated at the new setting. Allow 5-7 minutes for water to reach new temperature.</td>
</tr>
<tr>
<td>Water comes out of the vent instead of spout.</td>
<td>• Outlet tube is blocked.</td>
<td>Check that outlet tube is not kinked, twisted or pinched.</td>
</tr>
<tr>
<td>Water is dripping from the spout/vent intermittently.</td>
<td>• The expansion chamber is not draining properly due to low water pressure.</td>
<td>Unplug the unit. If the dripping does not stop after a few minutes, check the supply valve to ensure that it is fully open and there are no obstructions in the water line reducing the pressure below 20kPa (30 psi) (i.e. a poorly mounted saddle valve, a clogged water filter or partially opened shut-off valve).</td>
</tr>
<tr>
<td>Water discoloration/rust appearance.</td>
<td>• Corrosion of unit.</td>
<td>Unplug and drain unit. If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorised InSinkErator service agent.</td>
</tr>
</tbody>
</table>

Corrosion

• Regularly check for signs of corrosion by examining the appearance of the dispensed water.

• If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorised InSinkErator service agent.

Cleaning

• Use only mild cleaners to clean the tap and plastic components.

• Cleaners with acids, abrasives, alkaline or organic solvents will result in deterioration of the plastic components and void the warranty.

PERSONAL INJURY

• Regularly check for signs of corrosion by examining the appearance of the dispensed water.

• If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorised InSinkErator service agent.

CARE AND USE

Notice

Regularly inspect the unit for any signs of leakage. If there are signs of water damage, immediately remove the unit from service.

• A drainage pan, plumbed to an appropriate drain or fitted with a leak detector, should be used in those applications where any leakage could cause property damage.

Cleaning the Tap

• Use only mild cleaners to clean the tap and plastic components.

• Cleaners with acids, abrasives, alkaline or organic solvents will result in deterioration of the plastic components and void the warranty.

PERSONAL INJURY

• Regularly check for signs of corrosion by examining the appearance of the dispensed water.

• If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorised InSinkErator service agent.

Cleaning

• Use only mild cleaners to clean the tap and plastic components.

• Cleaners with acids, abrasives, alkaline or organic solvents will result in deterioration of the plastic components and void the warranty.

Personal Injury

• Regularly check for signs of corrosion by examining the appearance of the dispensed water.

• If the water discoloration remains after draining and reflowing the unit, discontinue use and contact an authorised InSinkErator service agent.
STEAMING HOT TAP TROUBLESHOOTING

**Permitted Uses**

- Water taps and component parts that have been manufactured by an authorized InSinkErator original equipment manufacturer (OEM).
- InSinkErator Product tap and component parts and/or Authorized OEM Products. "Authorized OEM Products" mean those hot or hot/cold water taps and component parts that have been manufactured by an authorized InSinkErator original equipment manufacturer (OEM) and are sold or packaged with the InSinkErator Product or installed by an authorized InSinkErator service representative.

**No Other Express Warranty Applies**

- The limited warranty is void if you attempt to repair the InSinkErator Product, install the replacement InSinkErator Product, or modify the replacement InSinkErator Product at any time.
- The warranty on the replacement InSinkErator Product will be limited to the unexpired term remaining in the original warranty.
- If a covered claim is made during the Warranty Period, Manufacturer will, through its authorized service representative, either repair or replace the InSinkErator Product.
- Repair or replacement shall be determined by Manufacturer or its authorized service representative.
- An authorized InSinkErator service representative may provide warranty service. InSinkErator is not responsible for warranty service provided by any other person or company.

**Customer Information**

- Only the original consumer owner of the InSinkErator Product with which this limited warranty is provided is covered under this warranty. You will be given the contact information for your closest authorized InSinkErator Service Center. Please contact your InSinkErator Service Center directly to receive in home warranty repair or replacement service.

**Manufacturers Service**

- InSinkErator (the "we") warrants to Customer (the "you") that your InSinkErator Product will be free from defects in materials and workmanship, subject to the terms and conditions of this limited warranty. This limited warranty is void if you attempt to repair the InSinkErator Product, install the replacement InSinkErator Product, or modify the replacement InSinkErator Product at any time.

**Warranty Period**

- The Warranty Period shall begin with the original installation of the InSinkErator Product. The original installation of the InSinkErator Product is provided to you at no cost to you. Repair or replacement shall be determined by Manufacturer or its authorized service representative.

**Warranty Claims**

- If a covered claim is made during the Warranty Period, Manufacturer will, through its authorized service representative, either repair or replace the InSinkErator Product. Replacement parts and labor are covered as part of this warranty.

**Exclusions**

- This limited warranty is void if you attempt to repair the InSinkErator Product, install the replacement InSinkErator Product, or modify the replacement InSinkErator Product at any time.

**Disclaimers**

- The limited warranty is void if you attempt to repair the InSinkErator Product, install the replacement InSinkErator Product, or modify the replacement InSinkErator Product at any time.

**Disclaimers**

- This limited warranty is void if you attempt to repair the InSinkErator Product, install the replacement InSinkErator Product, or modify the replacement InSinkErator Product at any time.

**LIMITED LIABILITY**

- This limited warranty is the sole and exclusive warranty provided to the Customer identified above. No other express warranty, whether written or verbal, applies. No employee, agent, dealer, or other person is authorized to alter this limited warranty or make any other warranty.

**EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES**

- Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply.

**Limitations of Liability**

- If a covered claim is made during the Warranty Period, Manufacturer will, through its authorized service representative, either repair or replace the InSinkErator Product. Replacement parts and labor are covered as part of this warranty.

**Warranty Registration**

- Manufacturer or its authorized service representative will determine, in its sole and absolute discretion, if your InSinkErator Product needs warranty service.

**Vendor Information**

- InSinkErator is not responsible for warranty service provided by any other person or company.

**Notice of Warranty**

- Notice of this limited warranty may be given in writing or electronically, and it is effective when received and acknowledged, and the notice of the limited warranty shall be placed on the packaging of the InSinkErator Product at the time it is delivered to you.

**Problems and Solutions**

- **Problem**
  - Water discolouration/
  - Water comes out of the tap
  - Water is dripping
  - Water is too hot or not hot enough

- **Possible Cause**
  - Corrosion of unit
  - Debris in the end piece
  - The electric outlet is inoperative
  - May be normal during initial set-up
  - May be normal during initial set-up
  - Unplug the unit. If the dripping does not stop after a few minutes, check the supply valve to ensure that it is fully open and there are no obstructions in the control including, without limitation, accident, alteration, misuse, abuse, neglect, negligence (other than Manufacturer's), or installation of the replacement InSinkErator Product are provided at no cost to you. Repair or replacement shall be determined by Manufacturer or its authorized service representative.

**Warranty Service**

- Only the original consumer owner of the InSinkErator Product with which this limited warranty is provided is covered under this warranty. You will be given the contact information for your closest authorized InSinkErator Service Center. Please contact your InSinkErator Service Center directly to receive in home warranty repair or replacement service.

**Warranty Service**

- Only the original consumer owner of the InSinkErator Product with which this limited warranty is provided is covered under this warranty. You will be given the contact information for your closest authorized InSinkErator Service Center. Please contact your InSinkErator Service Center directly to receive in home warranty repair or replacement service.
